

American Security Fund (ASF) supports [H.R. 2385](#), the Creating Resources for Every American To Experiment with Artificial Intelligence Act of 2025, or the CREATE AI Act, that would establish the National Artificial Intelligence Research Resource (NAIRR).

The Act would strike the essential balance between facilitating American technological innovation and protecting American national security, creating pathways for bright minds and dynamic companies to push boundaries; establishing robust safeguards against emerging threats, including theft and manipulation; and ensuring America maintains our competitive edge in the global economy without compromising our national interests.

It would help American businesses thrive, including by creating high-tech jobs, and maintain America's position at the forefront of technological advancement.

ASF commends Representative Obernolte's and Representative Beyer's leadership in introducing H.R. 2385.
